

	TITLE
1	Green buildings in Malaysia towards greener environment: Challenges for policy makers
2	New multivariate linear regression real and reactive branch flow models for volatile scenarios
3	Energy sources choice and environmental sustainability disputes: an evolutionary graph model approach
4	The Impact of Minimum Energy Performance Standards (MEPS) Regulation on Electricity Saving in Malaysia
5	Modeling in Energy Sector: A Comparison Between Developing and Developed Countries
6	Greenhouse Gas Emission Estimation for Selected Crops and Rice Cultivation in Urban and Non-Urban Areas of Sarawak
7	Community responses to flood risk management – An empirical Investigation of the Marine Protected Areas (MPAs) in Malaysia
8	Modeling technical change in climate analysis: evidence from agricultural crop damages
9	Water Supply Treatment Sustainability of Semambu Water Supply Treatment Process - Water Footprint Approach
10	Immune network algorithm in monthly streamflow prediction at Johor river
11	Design of dictionary based on Discrete Tchebichef Transform
12	Identification of power poles based on satellite stereo images using graph-cut algorithm
13	Low-carbon transition through a duty to divest: Back to the future, ahead to the past
14	Combined heat and power (CHP) economic dispatch solved using Lagrangian relaxation with surrogate subgradient multiplier updates
15	Utilization of artificial immune system in prediction of paddy production
16	Water Supply Treatment Sustainability of Panching Water Supply Treatment Process - Water Footprint Approach
17	Towards greener environment: Energy efficient pathways for the transportation sector in Malaysia
18	Enhancing energy security in Malaysia: The challenges towards sustainable environment
19	Assessing climate change mitigation proposals for Malaysia: Implications for emissions and abatement costs
20	Introducing hydrogen fuel cell vehicles in Malaysia
21	Implications of climate change damage for agriculture: sectoral evidence from Pakistan
22	Empirical Penman-Monteith equation and artificial intelligence techniques in predicting reference evapotranspiration: A review
23	A comparative analysis of climate-risk and extreme event-related impacts on well-being and health: Policy implications
24	An evidence-based review of impacts, strategies and tools to mitigate urban heat islands
25	Climate change mitigation: comparative assessment of Malaysian and ASEAN scenarios
